

▶ DARK WEB ID MONITORS & PROTECTS YOUR CUSTOMERS WHILE INCREASING MRR

Dark Web ID combines sophisticated, validated Dark Web intelligence with search capabilities to identify, **analyze** and proactively **monitor** for your customers' compromised or stolen data. Our robust, affordable service can be **easily** added to your solutions portfolio without requiring any hardware or software. It will help you drive additional **revenue** while protecting your customers' networks and email addresses from breach and theft that could result from credential exposure.

DIFFERENTIATE YOUR SERVICES

Access to high-margin credential monitoring services that will position you as a subject matter expert and make your managed services offering stand out from your competition.

DEPLOY IN MINUTES

An easy-to-use automated monitoring platform that you can deploy across your customer base immediately, with no additional hardware or software to install.

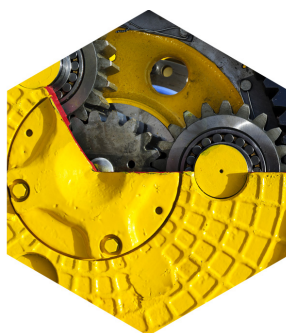

POWERFUL PROSPECTING TOOLS

Our Live Data Search and Company Profile tools let you identify target buyers that can benefit from your services and gather information about their business to assist with your sales pitch. Showing prospects their exposed data will increase your close rate exponentially.

PARTNER ENABLEMENT

We offer the most comprehensive partner enablement program in the industry, which includes a variety of marketing and sales resources, fully brandable turnkey campaigns, MSP sales training, and hands-on deal closing assistance from our Partner Success Team.

PLATFORM INTEGRATIONS

SaaS or API options available for MSPs, MSSPs, and systems integrators. Leverage out-of-the-box integrations with popular PSA platforms, including Kaseya BMS, Autotask, ConnectWise and more.

BETTER PROTECTION

Bring to light compromised customer credentials BEFORE a costly breach occurs. Access to the most validated dark web data on the market creates an opportunity to educate customers and strengthen their security.
